### Explanation of the Articles of the Calendar.

These pages are calculated for Toronto, Quebec, Fredericton, and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton and Halifax.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, and Halifax.

The column SUN ON MERIDIAN gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of longitude 4 h. 46 m. W. When in the column headed Moon's rising or setting or Moon on meridian the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4 h. 46 m. W. They are not corrected for parallax or refraction.

The column, UPPER TRANSIT OF POLE STAR shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4 h. 46 m. W. It passes in the morning from April 9 to October 9, and in the afternoon for the rest of the year. On October 9 there will be a second transit, occurring at 11 h. 55 m. 14 s. p.m.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude .....	42°		43°		44°		45°		46°		47°		48°		49°		50°										
	h	m	s	h	m	s	h	m	s	h	m	s	h	m	s	h	m	s									
Constant.....	5	53	49	5	53	35	5	53	26	5	53	14	5	53	2	5	52	49	5	52	36	5	52	22	5	52	8

MOON'S PHASES.—This Table gives the times for the four meridians when the moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, i. e., the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Degrees of Latitude.....	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	-5' 58"	-4' 5"	-2' 5"	0' 0"	+2' 12"	+4' 32"	+6' 59"	+9' 34"	+12' 18"
2nd Correction for each minute of latitude.....	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.5"	+ 2.6"	+ 2.7"	

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude 43° 20'...1st correction = - 4' 5"      2nd correction + 2.0 × 20 = + 40"  
 " " 47° 40'... " = + 4'32"      " " + 2.5 × 40 = + 1' 40"  
 " " 45° 10'... " = 0' 0"      " " + 2.2 × 10 = + 0' 22"

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a Star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

## Eclipses.

In the year 1871 there will be two Eclipses of the Sun, and two of the Moon.

I.—A partial eclipse of the Moon, January 6, 1871, partly visible in Canada.

The following Table gives the local mean astronomical time at which the several phases occur at various stations.

PHASE.	Halifax.	Frederic'tn	Quebec.	Montreal.	Kingston.	Toronto	London.	Pl. Garry.

Last contact with shadow.....	7 51	7 41	7 21	7 11	6 19	6 48	6 40	5 37

The first contact with the shadow occurs at 138° from the northernmost point of the Moon's limb towards the east; the last contact at 127° towards the west, in each case for *direct* image. Magnitude of the Eclipse (Moon's diameter=1) 0.688.

II.—An annular eclipse of the Sun, June 17, 1871, invisible in Canada.

III.—A partial eclipse of the Moon, July 2, 1871, invisible in Canada.

IV.—A total eclipse of the Sun, December 11, 1871, invisible in Canada.

Since its commencement, the Almanac has been enlarged from ninety-six to one hundred and forty pages, while the price has remained the same. The edition for this year is equal to the large editions hitherto obtained, offering the most desirable medium for advertising in the Dominion. To the contributors of the Canadian Almanac we beg respectfully to tender our sincere thanks for the invariable courtesy and attention received.

## MATHEMATICAL DEPARTMENT.

It is with great pleasure that we have again to notice a large number of solutions of the Problems in the Almanac for 1870, from our mathematical friends. Many of our correspondents have, by their elaborate solutions, exhibited an extensive knowledge of mathematics. The solutions of Messrs. Sullivan, Chute, Armstrong, Kidd, Moran, Cameron, Fleming, and particularly those of Messrs. Doyle, Mathews, Sheehan, Baird, Dunne, and Scudamore, are worthy of the highest credit. We insert this year a prize question, and those who send in its solution before February 15th, 1871, will have a chance for the "Cyclopedia of Mathematical Science," which will be granted for the best solution. Correspondents who desire written replies to their questions will please defray the expenses of postage. All communications to this Department must be in the hands of the publishers, Messrs. Copp, Clark & Co., before July 1st, 1871.

NOTE.—Through mistake, Mr. Sheehan was not credited in our last issue for solving Probs. 3, 13 and 21, of 1869, which he did correctly. Also, Mr. Finlay should have received credit for solving II. in Prob. 8 and Prob. 16 of the same year.

(1)-(49). A and B rent a pasture, into which A put 7 horses and B as many as cost him \$1.40 a week. Afterwards B put in three additional horses, and found that he had then to pay \$4.80 per week. At what rate was the pasture hired?

(2)-(50). Divide unity into four parts in A. P. so that the sum of their cubes may be  $4187\frac{65712}{}$ .

(3)-(51). If A had travelled 2-11ths of a mile an hour faster he would have finished his journey in 37-39ths of the time; but if he had travelled 2-11ths of a mile an hour slower he would have been 1-31-35ths hours longer on the road. How many miles did he travel?

(4)-(52). The wheel of a carriage is 5 feet in diameter, required the length of the successive cycloidal arcs generated by a nail in the circumference of the wheel in a distance of 24 miles?

(5)-(53). A broker has two kinds of money, it takes  $m$  pieces of the first to make a dollar and  $n$  pieces of the second to make the same sum. Some one offers him a dollar for  $r$  pieces; how many of each kind shall he take?

(6)-(54). Five men leased a Madoc gold claim for six months, for which they paid \$500. They agreed to share the cost according to the time that each employed men upon the claim. Now A employed 20 men and paid \$90; B 24 men, and paid \$104; C 32 men, and paid \$100; D 16 men, and paid \$50; and E 14 men, and paid the remainder. Required the time that each person's gang of men were employed?

(7)-(55). Solve the equations

$$(1) \quad (x^2 + 5)^2 - \left( 4x^2 + \frac{727}{14041} \right) = 25.$$

$$(II) \quad \frac{1}{x^2 + 3x - 4} + \frac{1}{5x^2 - 7x + 2} + \frac{1}{10x^2 - 18x + 8\frac{1}{2}} = 0.$$

$$(III) \quad 3h^2 \left\{ x^4 - \sqrt{x^3 - \frac{x^3}{3}} + \sqrt{\frac{x}{9}} \right\} = 2x^2(6-h) - 12\sqrt{\frac{1}{x}} + 2h\sqrt{\frac{1}{x}}$$

(8)-(56). A man possessed of \$11011 bequeaths to his oldest son an  $n$ th of the sum + \$  $P$ ; to the second an  $n$ th of the remainder + \$  $P$ ; and so on. In the end they all share alike. How many sons had he and what did each receive?

(9)-(57). Find the radius of that circle whose centre being taken in the circumference of another circle containing two acres, shall cut off half its contents?

(10)-(58). A B and C are three equal vessels; the first contains water, the second wine, and the third wine and water. If the contents of B and C be put together, it is found that the mixture is 11.25 times as strong as if the contents of A and C had been treated in like manner. Find the proportion of wine to water in the vessel C.

### Problems contributed by Correspondents.

(14)-(62). By John Matthews. A steamboat started from Hamilton and sailed down Lake Ontario; owing to the roughness of the lake, during the first four hours she only sailed 23 miles. of this the third hour's sailing was double the first. the fourth was  $\frac{1}{2}$  mile less than their sum, and the second was one-third of the distance, equal to  $\frac{1}{2}$  miles more than twice the third hour's sailing. Continuing this progression, how far was the boat from Hamilton at the end of the tenth hour?

(15)-(63). By A. Doyle. A line 16 inches long is a common tangent to 4 circles touching one another; it is divided in the points of contact A B C D such that  $A B^2 = 3 B C^2$  and  $B C^2 = 5 C D^2$ . The difference between the diameters of the first and fourth circles is  $7.311521963$ . Required the areas of the four circles?

(16)-(64). By Wm. Dunne. A Local Supt. divides \$360 between four schools in G. P., and each school received as many dollars as there were pupils attending it on an average. No. 1 receiving the smallest share. It was then found that the amount received by No. 3 exceeded the  $\frac{1}{2}$  of that received by No. 1 by \$90. Required the sum apportioned to each school?

(17)-(65). By John Cameron. A. B. and C, commence business with an aggregate capital of \$1200. C's capital exceeds A's by \$100. A sells out in 10 months. B in  $7\frac{1}{2}$  months, and C in 5.9-ths months, and each receives in stock and profit \$700. Find each person's stock?

(18)-(66). By R. S. Finlay. A military commander stations his men in such a position that in case of an attack on either of the three towns of Chatham, Goderich, or Hamilton, he may have on the whole the least possible distance to march, and supposing the probabilities of an attack on any one of them being equal. Find the expectation of the length of his march to relieve one of them without knowing which, and the distance of his station from each of these places—the distance from Chatham to Goderich 88 miles, from Goderich to Hamilton 98, and

(11)-(59). The discount on \$ P due x years hence is to \$ P :: m : n. Find the rate of interest?

An aged man two daughters had,

And they were very fair;

To each he gave a piece of land,

A circle and a square.

At twenty shillings an acre just

The land its value had;

The money that enclosed the whole

Just for the land was paid.

If every shilling be an inch,

As it is very near,

Required the acres in each piece,

The circle, and the square?

## PROVINCE OF MANITOBA.

SEAT OF GOVERNMENT—FORT GARRY.

LIEUT.-GOVERNOR OF MANITOBA AND NORTH WEST TERRITORIES—HON. A. G. Archibald. Geo. P. Hill, *Private Secretary*.  
EXECUTIVE COUNCIL.*Provincial Secretary*—Hon. Alfred Boyd. *Treasurer*—Hon. Marc A. Girard. *D. Boutillier, Clerk*.

The whole of the vast Territory hitherto held by the Hudson's Bay Company, under Royal Charter issued in the 22nd year of the reign of Charles II. and transferred to the Imperial Government on the 1st day of December, 1869 (the Company receiving an indemnity from the Canadian Government of £300,000 sterling), was by order of H. M. the Queen in Council, dated 23rd day of June, 1870, admitted into the Union or Dominion of Canada.

The portion of the Territory hitherto known as the Selkirk or Red River Settlement has been erected into a Province, to be called the Province of Manitoba. It contains an area of 14,340 square miles—9,177,600 acres, and is bounded as follows—“commencing at the point where the meridian of ninety-six degrees west longitude from Greenwich intersects the parallel of forty-nine degrees north latitude—thence due west along the said parallel of forty-nine degrees north latitude (which forms a portion of the boundary line between the United States of America and the said North Western Territory) to the meridian of ninety-nine degrees of west longitude—thence due north along the said meridian of ninety-nine degrees west longitude, to the intersection of the same with the parallel of fifty degrees and thirty minutes north latitude—thence due east along the said parallel of fifty degrees and thirty minutes north latitude to its intersection with the before mentioned meridian of ninety-six degrees west longitude—thence due south along the said meridian of ninety-six degrees west longitude to the place of beginning”—being 3 degrees of longitude and 1½ latitude. The Province will be represented at present in the Senate of the Dominion, by two members, and in the House of Commons by four elective members.

The Government will consist of a Lieutenant Governor and an Executive Council of five members; the Legislature, of a Legislative Council of seven members, appointed for life, and a Legislative Assembly of (24) twenty-four elective members, the Province to be divided into 24 electoral divisions for that purpose.

It is provided that either the English or French language may be used in the Legislature, and the public records and documents are to be printed in both languages.

The Province, not being in debt, will receive from the Dominion Government interest at the rate of 5 per cent. per annum, on the sum of \$472,090; a yearly subsidy of \$30,000 for the support of its government and Legislature and an annual grant, in aid of the Province, of 80 cents per head of the population, estimated at 17,000 souls, such grant to be augmented in proportion to the increase of population until it amounts to 400,000 souls, at which amount the grant will remain thereafter.

To extinguish the Indian title to the lands in the Province, 1,400,000 acres of ungranted lands are to be appropriated for the benefit of the half-breed residents.

The following are the present routes to the new Province:—

1st. *Via* Detroit, Chicago, St. Paul, and St. Cloud—fare from Toronto to the latter place \$28 50, \$5 gold, remainder in American currency.

2nd. *Via* Grand Haven and Milwaukee to St. Paul and St. Cloud, same fare as the first route.

3rd. *Via* Collingwood, Sault Ste. Marie and Duluth, thence by rail to St. Paul and St. Cloud, fare about \$5 less than the before-mentioned routes.

The route followed by the troops of the Red River expedition is not one which could, in its present state, be used by emigrants going to the new Province.

The cost of the trip from St. Cloud to Fort Garry depends on circumstances—the number of people travelling together and the manner in which they live and travel.—The average cost of the trip from Toronto to the Settlement is about \$60 to \$70 for each adult in a party.

NOTE.—The above are the only appointments of which we have received notice. Further information will be given in an Addenda, if received before publication.—Ed.

15. An application to obtain the extension of a former Patent to the whole of the Dominion must be accompanied with the former Patent itself, with neat duplicate copies of the original specification and drawings, certified by the inventor before the same two witnesses signing the Petition, and the said Petition shall be made after the following form:

To the Commissioner of Patents, Ottawa.

I, [names] of the [locality of residence] in the County of [name of County] in the Province of [or elsewhere, as the case may be] being a British subject [or a resident of Canada for upwards of a year] and being the discoverer [or inventor] of the subject matter of a Patent granted to me on [day, month and year], in the Province of [Nova Scotia, New Brunswick or former Province of Canada, or for the Provinces of Ontario and Quebec, as the case may be] which I now produce. and the said subject matter of my said invention and Patent called [name of invention] being not, with my consent, known or used, nor on sale in any of the other Provinces of the Dominion. I hereby therefore pray, that a Patent under the "Patent Act of 1869" be granted to me extending the privileges of my former Patent over the whole of the Dominion.

In testimony thereof I have signed in the presence of the two undersigned witnesses at the place and date hereunder mentioned.

[Place and date.] [Signature of Applicant.]

[Signature of the two witnesses.]

17. The models required by law must be neat and substantial working models, the dimensions of which are not to exceed, in any case, eighteen inches in their longest side, unless otherwise allowed by special permission previously obtained; such models must be so constructed as to show exactly every part of the invention and its mode of working. In cases where samples of ingredients and samples of the composition made of such ingredients [neither of which being dangerous or explosive substances] are required by law they must be contained in glass bottles properly arranged. Both models and bottles must bear the name of the inventor, the title of the invention, and the date of the application; and they must be furnished to the Patent Office free of every charge and delivered in good order.

18. All fees required by law shall be transmitted with the application to which they appertain in values not subject to any discount, and be better made, whenever practicable in Post Office money orders, inclosed in registered letters.

19. All applications must be proceeded with and perfected within two years after the lodging of the petition, in default of which it will be regarded as abandoned, and all previous proceedings and payment of fees will be held at the expiration of that period as of no avail.

20. Two or more separate inventions cannot be claimed in one application, nor patented in one patent, unless they are so dependent of and connected with each other as to be necessarily taken together to obtain the end sought for by the inventor; and in this latter case the Commissioner of Patents is the judge as to whether or not the pretensions of the applicant are founded in fact and reason.

21. The filing of a protest against the issuing of a patent shall not be taken in itself as a sufficient reason to withhold the granting of such patent to an applicant.

22. In cases of doubt, and in accordance with the letter and meaning of the law, Patents may be issued for an invention already patented, a trial before a judicial tribunal being in such cases the only means of discovering who is the real or first inventor.

23. A Caveat must be composed of a specification [and drawings], and as long as it remain uninterfered with, and that the filer is not called upon to lodge his application in due form on account of an interfering application, the said proprietor thereof can lodge with it additional papers, provided these papers are relevant exclusively to the perfecting of the same invention in progress of completion.

24. All cases connected with the intricate and multifarious proceedings issuing from the working of a law of Patents of Invention, which are not specially defined and provided for in these rules, shall be decided in accordance with the merits of each case by authority of the Commissioner of Patents, and the decision shall be communicated to the interested parties, through the Departmental correspondent of the Patent Office.

NOTICE.

The correspondence with the Department is carried, through the Canadian Mail, free of postage.

The forwarding of any paper should always be accompanied by a letter, and a separate letter should be written in relation to each distinct subject.

It is particularly recommended that reference should be made to the law before writing on any subject to the Department; in order to avoid unnecessary explanations and useless loss of time and labour; and it is also recommended, and in every case to have the papers and drawings prepared by a competent person, for the interest both of the applicant and of the public service.

A sufficient margin should be left on every paper, and specially on specifications and assignments for the insertion of references, or certificates, and for the affixing of the seal thereto.

Although it is optional for the applicant to annex drawings to the specification of a Caveat or not, still it is important, in the interest of the party, always to attach drawings to the said specification.

It must be remembered that the better papers are executed, the sooner the work is dispatched at the office, and the surer the regularity of the proceedings is guaranteed.

It must be remembered, when drawing the Petition for a Patent of Invention that, if a change in the residence mentioned has taken place during the year next to the date of the Petition, the change or changes should be mentioned in accordance with the 12th Section of the Patent Act of 1869.

## MEDICAL INSTITUTIONS AND SCHOOLS.

MEDICAL COUNCIL.—The act under which the Upper Canada Medical Board was constituted was repealed, in 1865, by an Act of the late Province of Canada, which has since been repealed by an Act of the Legislature of the Province of Ontario—taking effect from the 23rd day of January, 1869. This new Act, called "The Ontario Medical Act," incorporates the whole profession of Ontario under the name of "The College of Physicians and Surgeons of Ontario," and grants certain powers to the College which are exercised by an executive body called "The Council of the College, &c. &c." The profession, through its Council, has the power of establishing a curriculum of studies, which shall be observed by all medical teaching bodies in Ontario, and by all students of medicine.

The act also deprives all universities, colleges or schools of medicine of the privilege hitherto enjoyed, of granting a diploma entitling its holder to legal recognition in this Province, and places the sole licensing power in the hands of a Board of Examiners to be annually appointed by the Council. The degree or diploma of an university or college of any part of the world henceforth only possesses an honorary value in Ontario, unless granted before the 23rd day of July, 1869. Only British or Colonial diplomas confer any rights if granted before that date.

Every person, in order to become legally qualified to practice, is required to have his name registered in the Register kept by the Registrar of the College. At the beginning of each year the Registrar publishes in a book a list of all persons registered, with their names in full, residence, address and the degrees or diplomas possessed by each. This book is called the *Ontario Medical Register*, and is accepted in all Courts of Law and before all Justices of the Peace and others as *prima facie* evidence, that any person whose name is found therein, is registered according to law. The absence of the name of any person from such Register is also *prima facie* evidence that such person is not registered according to law; and no person, whose name does not appear in that Register, is entitled to charge for any advice, or for any medicine which he

shall have both prescribed and supplied. No one can collect fees in court for advice in either medicine, surgery, or midwifery, unless he be registered according to law, and his name be in the "list" of the current year. Nor can any unregistered person be appointed as medical officer, physician or surgeon in any branch of the public service, militia or otherwise, or to any hospital or other charitable institution not supported wholly by voluntary contributions; neither can any unregistered person give evidence (of a professional nature) before any coroner's or other court; nor is a certificate of lunacy valid from an unregistered person, nor any other certificate which the law requires from a physician or surgeon. This Register is sold to the public, and may be obtained by applying to the Registrar of the College.

The Council of the College is composed of thirty representatives of various medical interests. Two-thirds of this number are members of the general profession, or what is commonly called the "regular profession." Twelve being the representatives of twelve Medical Electoral Divisions into which Ontario is divided, and eight representing the Universities, Colleges and Schools of Medicine now existing in Ontario. The remaining third are members of two sects of medical practitioners, five representing the section known as "Homoeopaths," and five representing the section known as "Eclectics." Councillors are elected for a period of three years. No one who votes for a representative of a territorial division has a right to vote for either a Homoeopathic or Eclectic representative, and *vice versa*. The Council is composed as follows:—

## MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz.: a Canadian Packet on every Thursday, via Derry on Friday, sailing to Quebec in summer and Portland in Winter, by which the Postage rate is 3d. stg. per  $\frac{1}{2}$  oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada to New York, by which the Postage rate to Canada is 4d. stg. per  $\frac{1}{2}$  oz.

A Canadian Packet leaves Liverpool every alternate Saturday for Halifax, calling at Queenstown en route. Postage 3d. stg. per  $\frac{1}{2}$  oz., same as by Canadian Packet to Quebec or Portland.

The British Post Office forwards letters to Canada by the first packet sailing after the letter is posted, unless the letters bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated; "By Canadian Mail" is not a distinctive superscription; for any Mail for Canada is a "Canadian Mail," by whatever Packet forwarded.

## WEST INDIES, AUSTRALIA, CHINA, &amp;c., VIA NEW YORK.

West Indies (British) letters 13 cents per  $\frac{1}{2}$  oz., newspapers 4 cents each. (Foreign) letters 21 cents per  $\frac{1}{2}$  oz., newspapers 6 cents each. ## REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be careful to require them to be registered, and to obtain from the Post Master a Certificate of receipt for Registration.

The charge for Registration, in addition to the Postage, is as follows, viz.:

On Letters to any other place in Canada, or British North America - - - - - 2 cents.  
On Letters for the United States - - - - - 5 "  
On Letters for the United Kingdom - - - - - 8 "  
On Letters for British Colonies or Possessions, sent via England - - - - - 16 "

On parcels, patterns, or samples in Canada, 5 cents  
On book packets and newspapers to United Kingdom, 8 cents.

Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered Letter.

## MISCELLANEOUS CHARGES.

The charge on Parcels by the Parcel Post, which is limited to places within the Dominion, is 12 $\frac{1}{2}$  cents per 8 oz. (with 5 cts. additional if Registered.)

Prices Current, Hand Bills and other Printed Matter of a like character, and on Books, bound or unbound, when posted at a Canadian Post Office addressed to any place in the Dominion of Canada, British North America generally, or the United States.

The postage upon Prices Current addressed to the United Kingdom is two cents each, which must be prepaid by postage stamps, or they will be sent to the Dead Letter Office to be returned to the senders.

## NEWSPAPERS AND PERIODICALS.

Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, if paid quarterly in advance by either the publisher at the post office where the papers are posted, or by subscriber at the delivering post office:

For a paper published 6 times a week, 30 cents per quarter.  
" " 3 " 15 " "

When the above rates are not paid in advance by either publisher or subscriber, such Papers are charged one cent each on delivery.

## TRANSIENT NEWSPAPERS.

In all cases the postage must be prepaid. Letters for the United Kingdom, if posted unpaid or insufficiently paid will be forward-d,—but they will be charged on delivery with the amount of deficient postage, and a fine of three pence sterling.

Letters may be registered to all places, except those the names of which are followed by the letters n r, indicating that on registration can be effected.

The Registration Fee on letters addressed to the United Kingdom, is 8 cents each. In all other cases the Registration Fee is 16 cents from Canada to the place of destination; except in those cases where an asterisk is prefixed when a Registration Fee of 8 cents each letter, and a postage of 4 cents per half ounce must be collected; to this must be added double the ordinary rate of postage as given in this table.

Upon Letters, Newspapers, and Book Packets forwarded through the United States the following additional rates must be collected, viz., 2 cents per half ounce for Letters, 2 cents each for Newspapers, and 2 cents per four ounces for Book Packets.

On Book Packets not exceeding one ounce in weight, addressed to the United Kingdom, the postage is 2 cents; on Book Packets weighing more than one ounce, the progressive rates of postage will be found in the table below.

All Book Packets must be open at both ends, or both sides to allow of the inspection of the contents.

PERIODICAL PUBLICATIONS.

The rate on all Periodicals, other than Newspapers, passing by mail in Canada, save such as may be addressed to or received from the United Kingdom, is one cent per 4 oz. weight of package containing periodical matter, whether the package contain one or more numbers.

Any fraction of 4 oz. to be charged as a full rate.

No periodicals whatever, except exchanges, (i. e. periodicals passing between publishers in Canada, and between publishers in Canada and publishers in the United States, Prince Edward Island, or Newfoundland) are entitled to exemption from postage.

Transient Periodical matter posted in Canada must in all cases be prepaid by Postage Stamp.

The above rate will be payable on delivery on all Periodical matter received from the United States, except that Canadian Editors may receive Exchange Periodicals from the United States free of Canadian Postage.

Periodicals, printed and published in Canada, may be posted addressed to any place in the United Kingdom by Canadian Packet, on prepayment by Postage Stamp of two cents each number.

No package of periodicals can be sent through the Post, if it exceed 4 lb. in weight.

POSTAGE RATES ON MISCELLANEOUS MATTER.

Patterns or samples of merchandise and goods for sale, not exceeding 24 oz. in weight, may be posted in Canada to be forwarded to any place within the Dominion, on prepayment by postage stamp of a rate of 1 cent. per ounce, under the following regulations:

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples however of seeds, drugs, and so forth, which cannot be sent in open covers, may be enclosed in bags of linen or other material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The Packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; also a trade mark and numbers, and the price of the article enclosed; *inside*, there must be no enclosure but the samples or patterns themselves; the particulars however of the trade marks, numbers and price, may be marked on the articles themselves, instead of on the outside of the Packet, at the option of the sender.

Any sample or pattern Packet containing a letter, or otherwise violating the conditions of the preceding rules, will be rated and treated as a letter.

The rate of one cent. per ounce is to be pre-paid by postage stamp, and, if such rate be not fully pre-paid by the stamps affixed, the Packet is to be rated with the deficient postage and a fine of five cents in addition.

Packets of samples and patterns may be registered on prepayment by postage stamp of a registration fee of 5 cents in addition to the postage rate, and provided such Packets be handed in to the post office for registration.

No Packet of samples or patterns must exceed 24 oz.

These regulations apply only to the transmission of Packets of samples and patterns within the Dominion of Canada, and will not in any manner interfere with the regulations governing the exchange of samples and patterns with the United Kingdom, or with the foreign countries to which the same advantage extends, namely, France, Belgium, Italy, German States, Netherlands, Portugal, Switzerland, and Denmark.

Book and newspaper manuscript, and printers' proof-sheets (whether corrected or not), maps, prints, drawings, engravings, photographs when not on glass or in cases containing glass, and sheet music (whether printed or written), may pass in covers open at the ends or sides, and provided that no letter, or other communication intended to serve the purpose of a letter, be enclosed therein, on prepayment, when posted in Canada, by postage stamp of the ordinary printed matter rate of one cent. per ounce; or upon payment of that rate on delivery of such matter when received in the mails from the United States.

POSTAGE OF BOOKS, PATTERNS AND SAMPLES.

Patterns of merchandise, and samples, may be forwarded between Canada and the United Kingdom, France, Italy, German States, Netherlands, Portugal, Switzerland, and Denmark, by the Canadian Packet mails, at book post rates, and subject to the following conditions:

There must be no writing or printing other than the address of the person for whom the packet is intended, the manufacturer's or trade mark and number, and price of the article.

Any infringement of the above regulations will render the packet liable to be treated and charged as a letter.

Samples of seeds, drugs, and similar articles intended for delivery within the United Kingdom, are now allowed to be sent in bags entirely closed, provided such bags be transparent, so that the officers of the Post Office may be able to satisfy themselves of the contents.

The rule which prohibited the transmission through the Post, as patterns, of articles of cutlery, &c., has been rescinded; and scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like articles, are now allowed to be forwarded by the Post as samples, provided they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags, and to the persons of the officers of the Post Office. Such articles, however, must be so packed that they may be easily examined; and it is made a rule that any packet containing such articles, which may be found to be insufficiently guarded, shall not be forwarded through the Post.

None of the articles named in the next preceding para-

graph may be sent as patterns or samples to any place abroad, except Germany, Belgium, and the British Colonies, and not to these places when addressed *via* France.

PATTERNS, LIMIT OF SIZE AND WEIGHT.

The limits of weight and size are as follows:—

If for Canada. 24 oz.; the United Kingdom, 24 oz.; France, 36 oz.; Germany, 8 oz.; the Kingdom of Italy, 36 oz.; Belgium, 8 oz.; the Netherlands, 16 oz.; Portugal, 16 oz.; the Azores, 16 oz.; Madeira, 16 oz.; Cape de Verda, 16 oz.; Denmark, 48 oz.; Switzerland, 48 oz.; Russia, 8 oz., Poland, 8 oz.; Greece, 48 oz.

If for Germany, the Kingdom of Italy, Belgium, the Netherlands, Denmark, or Switzerland, 24 inches in length and 12 inches in breadth or depth, Greece, 24 inches in length and 12 inches in width or depth.

Any infringement of the conditions laid down will render the packet liable to be treated and charged as a letter.

Bags entirely closed, even though they may be transparent, must not be used for the transmission of seeds to foreign parts.

No prints or printed matter will be allowed to pass by book post between the United Kingdom and Canada, unless printed on paper, parchment or vellum.

POST OFFICE SAVINGS BANKS.

The Post Office Savings Banks, established by statute in the first session of the Parliament of the Dominion, commenced operations in Ontario and Quebec on the 1st April, 1868.

The direct security of the Dominion is given by the statute for all deposits made.

At each Savings Bank Post Office the regulations may be read by the public, giving full information with respect to the mode of depositing and withdrawing money, and these regulations are printed on the cover of the Pass Book supplied to each depositor.

Any person may have a deposit account, and deposits are received daily, during the ordinary hours of Post Office business, of any number of dollars, from \$1 up to

\$300, the total amount which can be received from a depositor in any one year, except in cases to be specially authorized by the Postmaster General.

The Postmasters of Savings Banks will act as agents for the receipt of the money deposited for transmission to the Postmaster General, and for the payment by the Postmaster General of money withdrawn by depositors.

Each depositor is supplied with a pass book, and the sums paid in, or withdrawn, are entered therein by the Postmaster receiving or paying the same. In addition, a direct receipt for each amount paid in, is sent to the depositor from the Postmaster General, and the Postmaster General will issue a cheque, payable at any Post Office Savings Bank desired, for any sum withdrawn.

Every depositor's account is thus kept with the Postmaster General, and a depositor may pay into his or her account with the Post Office Savings Bank, at any of the Savings Bank Post Offices which at the time may best suit his convenience, and may exercise the same choice in drawing out money, subject only to the obligation of producing the pass book, in proof of identity—whenever paying in or drawing out money.

Interest at the rate of 4 per cent. per annum is allowed on deposits lying in the ordinary deposit accounts, but when a depositor has \$100 deposited, he or she may request the Postmaster General to transfer this sum to a special account, and will then receive a certificate of such special \$100 deposit, bearing interest at 5 per cent. per annum.

Postmasters are forbidden by law to disclose the name of any depositor, or the amount of any sum deposited or withdrawn.

No charge will be made to depositors on paying in, or drawing out money, nor for postage on communications with the Postmaster General in relation thereto.

The Postmaster General will be always ready to receive and attend to all applications, complaints, or other communications addressed to him by depositors or others, relative to Post Office Savings Bank matters.

REMARKS.—To find Discount for less than one per cent., as  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ , &c., take the difference between the current rate and the next highest figure. Thus:  $17\frac{1}{4}$  per cent. Premium is 14.71, 1. The difference between 17 and 18 per cent. Premium is 0.72, 4, which divide by  $\frac{1}{4}$  gives 0.18, 1; which add to 17, namely 14.53, 0, gives 14.71, 1.

**INDIGESTION.**—The popular and professional medicine is MORSON'S PEPSINE, the active digestive principle of the gastric juice. In Powder, Lozenges, Globules, and as Wine.

**CONSUMPTION.**—One of the greatest results of the chemical progress is the adaptation of the active property obtained from the Pancreas, and prepared as MORSON'S PANCREATIC EMULSION and POWDER. It enables the weakest stomachs to assimilate animal fat and oil, so essential to the constitution.

**WEAK CHILDREN.**—In all cases where the elements for the formation of bone are imperfect, MORSON'S WHEAT PHOSPHATES have never been known to fail.

**CHLORODYNE.**—MORSON'S celebrated Anodyne is now being supplied to the public.

Great caution is necessary as to where proprietary articles are purchased, particularly those with reference to the toilet. Shopkeepers of small repute offer for sale their spurious and pernicious imitations of proprietary articles, under the lure of being cheap, regardless of the consequences. ROWLAND'S TOILET REQUISITES, their MACASSAR OIL, KALYDOR, & ODONTO are peculiarly the subjects of these innovations.—*Morning Post.*

MANUFACTURERS OF

### SUPERIOR TABLE & POCKET CUTLERY, ELECTRO-PLATED SILVER WARES, viz.:

SPOONS, FORKS, CRUETS, CAKE BASKETS, TEA SETS, CUPS, GOBLETS, BUTTER COOLERS, TEA TRAYS, WAITERS, PITCHERS, PICKLE STANDS, DISH COVERS, LIQUEURS, BISCUIT BOXES, URNS, KETTLES, EPERGNES, CARD STANDS, BOUQUET HOLDERS.

Concerning the Spoon trade we recently remarked, "that formerly designations of A. B. & C. were considered an indication of quality, but unprincipled makers used these stamps on the most inferior articles, and therefore the stamp is of no value without the initials of responsible makers. The stamps adopted by us for Spoons and Forks indicate five grades of weight and quality; but even the lowest is an article to be recommended, and all grades, from the lightest to the heaviest, are electro-plated on THE CELEBRATED NICKELITE SILVER. The stamps are B, A 1, A, 12 oz. and 16 oz.; the last two indicate that each gross of Table Spoons have deposited upon them, respectively, by the galvanic battery, 12 or 16 ounces of Pure Silver; in all instances the initial marks of R. W. & Co. are impressed, to identify the manufacture. These are of a quality probably never before introduced in Canada; their extensive and ready sale is a proof of public appreciation of a thoroughly reliable article.

ALSO MANUFACTURERS OF THE

### Celebrated Nickelite Silver Spoons and Forks.

Nickelite Silver is a compound metal, the chief ingredient of which is derived from those extraordinary Meteoric Stones which are found in Northern Europe, and which are now said by scientific men to have descended from the planetary system. The combination with more ductile metals of this wonderfully hard and bright metal, but in such proportions as to retain its essential properties, has been the result achieved by the inventors of Nickelite Silver.

SPOONS and FORKS made of this metal are, for general domestic purposes, superior to anything before known. They are white, hard, and strong. They resist acids, clean easily, and wear well. They are silver in colour, tasteless in use, and endless in wear. They are of one metal throughout, of English fiddle pattern, and of best silver finish.

These unequalled table wares are specially adapted for HOTELS, TAVERNS, RESTAURANTS, and BOARDING HOUSES, and for the families of FARMERS, MECHANICS, TRADESMEN, MINERS, and FISHERMEN; also for every-day and domestic use in the families of MERCHANTS, PROFESSIONAL MEN and PRIVATE GENTRY.

Finally, they are within the reach of ALL CLASSES, their lowness of price is unprecedented, they are in fact the CHEAPEST and BEST VALUE IN THE WORLD.

All Nickelite articles are stamped with the trade mark, R. W. & Co., and are accompanied with a printed guarantee of quality from the manufacturers.

## Explanation of the Articles of the Calendar.

These pages are calculated for Toronto, Quebec, Fredericton, and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The column, SUN ON MERIDIAN, gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of longitude 4 h. 46 m. W. When in the column headed Moon's rising or setting, or Moon on meridian, the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4 h. 46 m. W. They are not corrected for parallax or refraction.

The column, UPPER TRANSIT OF POLE STAR shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4 h. 46 m. W. It passes the meridian in the morning from April 9 to October 8, and in the afternoon from October 10 to April 8. On October 9, there are two transits, namely, at 0m. 21s. a.m. and at 1h. 56m. 25s. p.m.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude .....	42°		43°		44°		45°		46°		47°		48°		49°		50°

MOON'S PHASES.—This Table gives the times for the four meridians when the moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, i. e., the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Latitude .....	42°	43°	44°	45°	46°	47°	48°	49°	50°

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

has for latitude 43° 20'...	1st correction = - 3'51"	2nd correction + 1.9" × 20 = + 0' 38"
" " 47° 40'... " " = + 4'16"	" " + 2.3 × 40 = + 1' 32"	
" " 45° 10'... " " = + 0' 0"	" " + 2.1 × 10 = + 0' 21"	

If the altitude of Polaris above the horizontal plane observed at the time of its meridian transit be corrected for refraction, the latitude of the place of observation will be found by subtracting the polar distance from the altitude so corrected, for the upper transit, and by adding the polar distance to the corrected altitude, for lower transit.

By observing Polaris with a horizontal circle at the time of its upper or lower meridian transit the direction of the meridian may also be found; but as its motion in azimuth at these instants is more rapid than at other points of its course, any error in the time will then produce the greatest possible effect on the azimuth. Near the time of greatest elongation, on the other hand, the change of azimuth is very slow; so that an error in the supposed time of observation will occasion a comparatively small error in the azimuth. On this account the instant of greatest elongation east or west of the meridian is the time most favourable for the determination of the meridian.

Again, as the point of greatest elongation is the one at which the change of altitude is most rapid, any error in the time will produce a comparatively large error in the altitude. Hence this part of the star's path is the worst that could be taken for finding the latitude.

As the transits of Polaris and the times of its greatest elongation often take place when the sky is clouded, or during daylight, several days may sometimes pass without the occurrence of an opportunity favorable for these observations with Polaris.

To remedy to some degree this inconvenience, tables are herewith given which contain the times of transit of three other circumpolar stars, with the intervals between the times of transit and of greatest elongation; and also their azimuths at the same instant.

Of the three stars β, ε, & δ Ursæ Minoris, δ, from being nearest to the pole, is on the whole the best adapted for the determination of the meridian; while β, though convenient on account of its greater brightness, is less suitable than the other two; since the length of the interval between the times of its meridian passage and greatest elongation, as well as its azimuth at the latter time, are both greatly affected by a change in the latitude.

On examining the table, it will be seen that an error of 10' in the assumed latitude will occasion an error of about 4' in the azimuth of the star.

In order to harmonize with the rest of the Calendar, where the times of transit of Polaris have been usually placed, the transits of that star are given in civil time; for greater convenience however the transits of β, ε, & δ Ursæ Minoris in the following table are in astronomical time, being reckoned from noon to noon. For the sake of brevity the transits are given for the 1st, 11th and 21st, and also on those days when two transits take place.

The times of meridian passage on any intermediate day may be readily found with sufficient accuracy by subtracting the following numbers from the recorded time that next precedes it in the table.

Number of days after day last recorded .....	1	2	3	4	5	6	7	8	9	10
Corresponding time to be subtracted .....	m s 3 56	m s 7 52	m s 11 48	m s 15 44	m s 19 40	m s 23 36	m s 27 32	m s 31 28	m s 35 24	m s 39 20

As in the case of the Pole Star, the lower transits of each of these stars will occur 11h 58m 2s (nearly) after the time of upper transit.

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a Star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

**Eclipses.**

In the year 1872 there will be two Eclipses of the Sun, and two of the Moon.

I.—A partial eclipse of the Moon, May 22, 1872. The middle of the eclipse occurs before the Moon rises in Canada. The last contact with the shadow occurs soon after the Moon rises at Halifax and Fredericton, but before she rises at western stations. The last contact with the Penumbra takes place after the Moon rises at the places named below, but before she rises at Fort Garry.

The following Table contains the local mean astronomical times at which such phases as are visible occur.

II.—An annular eclipse of the Sun, June 5, 1872, invisible in Canada. The line of central eclipse extends from a point in the Indian Ocean (Lat 5° 43' N. Long. 65° E.) across the Indian Peninsula and China, to a point in the Pacific (Lat. 27° 32' N. and Long. 155° 30' W.)

III.—A partial eclipse of the Moon, November 14, 1872, visible in Canada.

The local mean times at which the various phases occur at different stations are given in the following table.

IV.—A total eclipse of the Sun, November 30, 1872, invisible in Canada. The line of central eclipse extends from a point in the South Pacific (Lat. 15° 1' S.; Long. 173° 12' W.) eastward, south of Cape Horn, to a point in the South Atlantic (Lat. 41° 20' S.; Long. 12° 33' W.)

## FISHERIES OF THE DOMINION.

The aggregate value of the Fish products of the Provincial Fisheries is computed, by the Minister of Marine and Fisheries, to be nearly seventeen millions of dollars. Americans employ—tonnage varying—between eight and eleven hundred vessels in these Fisheries.

Their estimated annual catch is valued at about eight millions of dollars. The probable value of capital embarked in carrying on the inshore Fisheries is computed at nine millions of dollars. Thus making a total interest of some seventeen millions of dollars.

## THE METRIC SYSTEM.

*An Act to render permissive the use of the Metric or of the Decimal System of Weights and Measures.*—34 Vic. cap. 24.

WHEREAS for the promotion and extension of the internal, as well as of the foreign trade of Canada, and for the advancement of science, it is expedient to legalize the use of the Metric System of Weights and Measures: Therefore Her Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

1. This Act may be cited as the "Metric Weights and Measures Act, 1871."

2. Notwithstanding anything contained in any Act or Law now in force to the contrary, no contract or dealing shall be deemed to be invalid or open to objection, on the ground that the weights or measures expressed or referred to in such contract or dealing, are weights or measures of the Metric System, or on the ground that decimal subdivisions of legal weights and measures, whether Metric or otherwise, are used in such contract or dealing.

3. The tables in the schedules hereunto annexed shall be deemed to set forth, in terms of the standard weights and measures of Canada and the United Kingdom, the equivalents of the weights and measures therein expressed in terms of the Metric System; and such tables may be lawfully used for computing, determining and expressing, in weights and measures of Canada and of the United Kingdom, weights and measures of the Metric System.

4. Whenever the Governor in Council is of opinion that it has become necessary and desirable, he may direct Standards of Metric Weights and Measures to be procured and legalized, and verified copies of them to be provided, and may by Order in Council make regulations for authorizing and facilitating the use of the same, for the verification of Metric Weights and Measures in use in Canada.

MATHEMATICAL DEPARTMENT.

We have again to notice a large number of solutions of the Problems in the Almanac for 1871. It is gratifying to know that this Department is appreciated by so many intelligent correspondents throughout the country. Upwards of twenty attempts at the solution of the Prize Problem were received, only one of which was correct: that sent in by Mr. Andrew Doyle, Teacher of St. Patrick's School, Hamilton, to whom of course the prize was awarded. A correct solution of the Prize Problem was also received from Mr. W. Fleming, Teacher School No. 20 Markham, but too late to compete for the prize. We insert this year another Prize Problem; and those who send in its solution before February 15th, 1872, will have a chance for Smith's Classical Dictionary.

Correspondents who desire written replies to their questions will please defray the expenses of postage. All communications to this Department must be in the hands of the publishers, Messrs. Copp, Clark & Co., before July 1st, 1872.

NOTE.—We have to apologize to Mr. Sheehan for not giving him credit for solving Problem 9 of 1870, which he did correctly. Mr. R. S. Finlay is also entitled to much credit for having made a thorough investigation of Problem 13 of 1869: he is prepared to show on the best authority that the answer given in the Almanac is incorrect.

Mathematical Acknowledgments.

The Colony of British Columbia, by order of Her Majesty the Queen in Council, dated the 20th day of July, 1871, was admitted into the Union or Dominion of Canada. The following are the terms of union :

Canada to be liable for the debts and liabilities of British Columbia existing at the time of the Union.

British Columbia not having incurred debts equal to those of the other Provinces now constituting the Dominion, to be entitled to receive, by half-yearly payments in advance from the General Government, interest at the rate of five per cent. per annum on the difference between the actual amount of its indebtedness at the date of the Union, and the indebtedness per head of the Provinces of Nova Scotia and New Brunswick (27.77), the population of British Columbia being taken at 60,000.

The following sums to be paid by Canada to British Columbia for the support of its Government and Legislature, to wit, an annual subsidy of \$36,000 and an annual grant equal to 80 cents per head of the said population of 60,000, both half-yearly in advance, such grant of 80 cents per head to be augmented in proportion to the increase of population, as may be shewn by each decennial census, until the population amounts to 400,000, at which rate such grant shall thereafter remain, it being understood that the first census be taken in the year 1881.

The Dominion to provide an efficient mail service, fortnightly, by steam communication, between Victoria and San Francisco, and twice a week between Victoria and Olympia; the vessels to be adapted for the conveyance of freight and passengers.

Canada to assume and defray the charges for the following services:—Salary of the Lieutenant Governor; Salaries and allowances of the Judges of the Superior Courts and the County or District Courts; the charges in respect to the Department of Customs; the Postal and Telegraphic services; protection and encouragement of Fisheries; provision for the Militia; lighthouses, buoys and beacons, shipwrecked crews, quarantine and marine hospitals, including a marine hospital at Victoria; the Geological Survey; the Penitentiary; and such further charges as may be incident to and connected with the services which, by the British North America Act of 1867, appertain to the General Government, and as are or may be allowed to the other Provinces.

Suitable pensions, such as are approved of by Her Majesty's Government, to be provided by the Government of the Dominion for those of Her Majesty's servants in the Colony whose position and emoluments derived therefrom were affected by political changes on the admission of British Columbia into the Dominion of Canada.

The existing Customs Tariff and Excise Duties to continue in force in British Columbia until the Railway from the Pacific coast and the system of railways in Canada are connected, unless the Legislature of British Columbia should sooner decide to accept the Tariff and Excise Laws of Canada. When Customs and Excise Duties are, at the time of the Union of British Columbia with Canada, leviable on any goods, wares, or merchandises in British Columbia, or in the other Provinces of the Dominion, those goods, wares and merchandises may, from and after the union, be imported into British Columbia from the Provinces now composing the Dominion, or from either of those Provinces into British Columbia, on proof of payment of the Customs or Excise Duties leviable thereon in the Province of exportation, and on payment of such further amount (if any) of Customs or Excise Duties as are leviable thereon in the Province of importation. This arrangement to have no force or effect after the assimilation of the Tariff and Excise Duties of British Columbia with those of the Dominion.

British Columbia to be entitled to be represented in the Senate by three members, and by six members in the House of Commons. The representation to be increased under the provisions of the "British North America Act of 1867."

The influence of the Dominion Government to be used to secure the continued maintenance of the naval station at Esquimaux.

The provisions of the "British North America Act of 1867," to be applicable to British Columbia in the same way and to the like extent as they apply to the other Provinces of the Dominion, and as if the Province of

British Columbia had been one of the Provinces originally united by the said Act.

The Government of the Dominion undertake to secure the commencement simultaneously, within two years from the date of union, of the construction of a Railway from the Pacific towards the Rocky Mountains, and from such point as may be selected, east of the Rocky Mountains, towards the Pacific, to connect the seaboard of British Columbia with the Railway system of Canada; and further, to secure the completion of such Railway within ten years from the date of the union.

And the Government of British Columbia agree to convey to the Dominion Government, in trust, to be appropriated in such manner as the Dominion Government may deem advisable in furtherance of the construction of the said Railway, a similar extent of public lands along the line of Railway throughout its entire length in British Columbia, not to exceed, however, twenty (20) miles on each side of said line, as may be appropriated for the same purpose by the Dominion Government from the Public Lands in the North-west Territories and the Province of Manitoba. Provided that the quantity of land which may be held under pre-emption right or by Crown grant within the limits of the tract of land in British Columbia to be so conveyed to the Dominion Government shall be made good to the Dominion from contiguous public lands; and provided further, that until the commencement, within two years, as aforesaid, from the date of the union, of the construction of the said Railway, the Government of British Columbia shall not sell or alienate any further portions of the public lands of British Columbia in any other way than under right of pre-emption, requiring actual residence of the pre-emptor on the land claimed by him. In consideration of the land to be so conveyed in aid of the construction of the said Railway, the Dominion Government agree to pay to British Columbia from the date of the union, the sum of \$100,000 per annum in half-yearly payments in advance.

The Dominion Government will guarantee the interest for ten years from the date of the completion of the works, at the rate of five per centum per annum, on such sum, not exceeding £100,000 sterling, as may be required for the construction of a first class graving dock at Esquimaux.

The charge of the Indians, and the trusteeship and management of the lands reserved for their use and benefit to be assumed by the Dominion Government, and a policy as liberal as that hitherto pursued by the British Columbia government to be continued by the Dominion Government after the union.

To carry out such policy, tracts of land of such extent as it has hitherto been the practice of the British Columbia Government to appropriate for that purpose, shall from time to time be conveyed by the Local Government to the Dominion Government in trust for the use and benefit of the Indians, on application of the Dominion Government; and in case of disagreement between the two Governments respecting the quantity of such tracts of land to be so granted, the matter shall be referred for the decision of the Secretary of State for the Colonies.

## MEDICAL INSTITUTIONS AND SCHOOLS.

**MEDICAL COUNCIL.**—The act, called "The Ontario Medical Act," incorporates the whole profession of Ontario under the name of "The College of Physicians and Surgeons of Ontario," and grants certain powers to the College which are exercised by an executive body called "The Council of the College, &c." The profession, through its Council, has the power of establishing a curriculum of studies, which shall be observed by all medical teaching bodies in Ontario, and by all students of medicine.

The act also deprives all universities, colleges or schools of medicine of the privilege hitherto enjoyed, of granting a diploma entitling its holder to legal recognition in this Province, and places the sole licensing power in the hands of a Board of Examiners to be annually appointed by the Council. The degree or diploma of an university or college of any part of the world henceforth only possesses an honorary value in Ontario, unless granted before the 23rd day of July, 1869. Only British or Colonial diplomas confer any rights if granted before that date.

Every person, in order to become legally qualified to practice, is required to have his name registered in the Register kept by the Registrar of the College. This Register is published annually and sold to the public, and may be obtained by applying to the Registrar of the College.

The Council of the College is composed of thirty representatives of various medical interests, who are elected for a period of three years, and is composed as follows:—

LETTER RATES, ETC.

Canada.—Letters posted in Canada addressed to any place within the Dominion pass, if prepaid, for 3 cents per ½ oz., but if posted unpaid such letters are charged 5 cents per ½ oz. Letters mailed at any office for delivery by or from that same office, are charged one cent each and must be prepaid, otherwise they are sent to the Dead Letter Office.

British Columbia.—The rate of postage on letters to British Columbia and Vancouver's Island is the same as to any other Province in the Dominion.

Manitoba.—Letters, &c., for Manitoba are now charged the ordinary Canadian postage rates

Newfoundland.—Postage on letters 12½ cents per ½ oz. Newspapers 2 cents each. Prepayment necessary.

Prince Edward Island — Postage on letters 3 cents per ½ oz. if prepaid, 5 cents if unpaid. Newspapers 2 c. each

United States.—The rate on letters to the United States is 6 cents per ½ oz. if prepaid, 10 cents if unpaid. Newspapers 2 cents each.

MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz.: a Canadian Packet on every Thursday, via Derry on Friday, sailing to Quebec in summer and Portland in Winter, by which the Postage rate is 3d. stg. per ½ oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada to New York, by which the Postage rate to Canada is 4d. stg. per ½ oz.

A Canadian Packet leaves Liverpool every alternate Tuesday for Halifax, calling at Queenstown en route. Post-

age 3d. stg. per ½ oz., same as by Canadian Packet to Quebec or Portland.

The British Post Office forwards letters to Canada by the first packet sailing after the letter is posted, unless the letters bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated "By Canadian Mail" is not a distinctive superscription; for any Mail for Canada is a "Canadian Mail," by whatever Packet forwarded.

WEST INDIES VIA HALIFAX.

Letters for the West Indies, British and Foreign, are sent via Halifax and Bermuda, monthly; postage 12 cents per ½ oz., newspapers 2 cents each; books, 6 cents per 4 oz. No unpaid correspondence forwarded by this route.

REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be careful to require them to be registered, and to obtain from the Post Master a Certificate of receipt for Registration.

The charge for Registration, in addition to the Postage, is as follows, viz.:

- On Letters to any other place in Canada, or British North America - - - - - 2 cents.
- On Letters for the United States - - - - - 5 "
- On Letters for the United Kingdom - - - - - 8 "
- On Letters for British Colonies or Possessions, sent via England - - - - - 16 "
- On Letters for France and other Foreign Countries, via France (see Table).

On parcels, patterns, or samples, in Canada, 5 cents  
On book packets & newspapers to United Kingdom, 8 cts.  
Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or error, may affect an Unregistered Letter.

PARCEL POST.

The charge on Parcels by the Parcel Post, which is limited to places within the Dominion, is 12½ cents per 8 oz. (with 5 cts. additional if Registered.)

B OK POST.

A Book Packet may contain any number of separate books, publications, works of literature and art, maps or prints, photographs, daguerotypes, when not on glass, or in frames containing glass; any quantity of paper, vellum or parchment (to the exclusion of letters); and the books, maps, papers, &c., may be either written, printed or plain, or any mixture of the three; and may be either British, Colonial or Foreign

Book Packages must be open at both ends or both sides. The rate on Book Packages between any place in Canada, and to P. E. I. and Newfoundland, is one cent per ounce.

Patterns or samples of merchandise and goods for sale, not exceeding 24 oz. in weight, may be posted in Canada to be forwarded to any place within the Dominion, on prepayment by postage stamp of a rate of 1 cent. per ounce, under the following regulations:

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples however of seeds, drugs, and so forth, which cannot be sent in open covers, may be enclosed in bags of linen or other material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The Packet may bear on the outside the address of the sender, in addition to the address of the person for whom it may be intended; also a trade mark and numbers, and the price of the article enclosed; inside, there must be no enclosure but the samples or patterns themselves; the particulars however of the trade marks, numbers and price, may be marked on the articles themselves, instead of on the outside of the Packet, at the option of the sender.

Any sample or pattern Packet containing a letter, or otherwise violating the conditions of the preceding rules, will be rated and treated as a letter.

The rate of one cent. per ounce is to be pre-paid by postage stamp, and, if such rate be not fully pre-paid by the stamps affixed, the Packet is to be rated with the deficient postage and a fine of five cents in addition.

Packets of samples and patterns may be registered on prepayment by postage stamp of a registration fee of 5 cents in addition to the postage rate, and provided such Packets be handed in to the post office for registration.

## POSTAGE RATES, ETC., ON PATTERNS AND SAMPLES, TO UNITED KINGDOM AND FOREIGN PARTS.

Patterns of merchandise, and samples, may be forwarded between Canada and the United Kingdom, France, Italy, German Empire, Netherlands, Portugal, Switzerland, and Denmark, by the Canadian Packet mails, at book post rates, and subject to the following conditions:

There must be no writing or printing other than the address of the person for whom the packet is intended, the manufacturer's or trade mark and number, and price of the article.

Samples of seeds, drugs, and similar articles intended for delivery within the United Kingdom, are now allowed to be sent in bags entirely closed, provided such bags be transparent, so that the officers of the Post Office may be able to satisfy themselves of the contents.

Bags entirely closed, even though they may be transparent, must not be used for the transmission of seeds to foreign parts.

The rule which prohibited the transmission through the Post, as patterns, of articles of cutlery, &c., has been rescinded; and scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like articles, are now allowed to be forwarded by the Post as samples, provided they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags, and to the persons of the officers of the Post Office. Such articles, however, must be so packed that they may be easily examined; and it is made a rule that any packet containing such articles, which may be found to be insufficiently guarded, shall not be forwarded through the Post.

None of the articles named in the next preceding paragraph may be sent as patterns or samples to any place abroad, except Germany, Belgium, and the British Colonies, and not to these places when addressed via France.

## List of Post Offices in Canada on the 1st August, 1871.

The Offices printed in Italics are authorized to grant and pay Money Orders. The Offices marked \* are Savings Bank Offices. The letters "W. O." following the name of a Post Office, signify "Way Office." The capital letters on the right of the County column indicate the several Provinces of the Dominion.

To meet the wishes of many of our friends in Ontario, we have, though only in the case of that Province, substituted the name of the Township in which the Post Office is situated for that of the Electoral Division. Should the name of the County also be required, reference may be made to the list of Township Municipalities (see Index).

## THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the act 37 Geo. III. c. 13, which enabled the then practitioners of the law to form themselves into a society and make rules for its government. By the act of 1822, 2 Geo. IV. c. 5, "the Treasurer and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By the act of last session, 34 Vic. c. 15, the Benchers heretofore appointed from time to time by their own body, are made, exclusive of *ex officio* members, elective by the Bar. The *ex officio* consisting of the Attorney General for the time being, and all members of the Bar of Ontario who have at any time held the office of Attorney or Solicitor General of the former province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario. The elective thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the act. Vacancies during the term to be filled by the remaining Benchers. The Judges of the Superior Courts are Visitors of the Society, and, on the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, and who is also President of the Society. The Benchers sit in convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head quarters of the Society, in which is provided accommodation for the Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

# Confederation Life Association OF CANADA.

HEAD OFFICE, MASONIC HALL, TORONTO.  
GUARANTEE CAPITAL, \$500,000.

STOCK AND MUTUAL PLANS COMBINED.

Deposited with the Dominion Government for security of Policy Holders, \$50,000.

THIS ASSOCIATION offers the following advantages :

1. It is a Canadian Institution, under home management.
2. Perfect security, furnished by character of Directorate, wealthy proprietary, and large guarantee capital, only one-tenth of which participates in profits.
3. Holders of Mutual Policies share in profits and management. By the Act of Incorporation, at least one-third of Board of Directors must be chosen from the holders of this class of Policies, and at least nine-tenths of profits thereon must be distributed among such policy-holders.
4. Equal and just application of non-forfeiture principle—not arbitrary, but fixed by charter.
5. A Policy free from vexatious restrictions—being nearly world-wide.
6. Its investments made in Canada—thus fostering home enterprises and tending to counteract the present drain from this source upon our wealth into foreign channels.
7. Comparatively low rates—its premiums with profits over ten per cent. less than those ordinarily charged by mutual companies, and its rates without profits over 25 per cent. less than the same.

Commencing in the above year in a modest and unpretentious manner, they have by patient industry, untiring diligence, and unceasing attention, steadily and safely extended their business until it has reached its present

## COLOSSAL PROPORTIONS.

## THEY EMPLOY NO TRAVELLERS,

And when it is stated that the increase of their sales in the September of 1871, as compared with September 1870, was over

\$50,000!!

It will at once be apparent that they REQUIRE NONE. To the Trade of the

The greatest possible Perfection of System and Management.

# JOHN MACDONALD & CO.

Have learnt during their long Business Experience a great many Lessons, and among them the following, viz. :—

- That there is no royal road to success ;
- That if a man will be prosperous he must be diligent ;
- That no business can be successful where the EXPENDITURE is not closely watched ;
- That a man should UNDERSTAND the business he undertakes ;
- That nothing is lost by being courteous and attentive to all ;
- That money is a poor substitute for character ;
- That judicious INSURANCE is a wise expenditure of means ;
- That the neglect of it is a wrong alike to the man himself and his creditors ;
- That if men are well served they will gain little by changing ;
- That it is bad for men to buy HORSES, BUGGIES, PIANOS, FINE CARPETS, and VILLAGE LOTS until they can COMFORTABLY take the money for the same out of their profits, and do this without having to ask any one to wait for them.
- That it is a bad thing for a man to be careless about his obligations.
- That the stain of a DISHONEST COMPROMISE can only be wiped out by a resolute determination to redeem one's CHARACTER ;
- That buying well means selling well ;
- That keeping one's stock well and constantly assorted means a steadily increasing business ;
- That the neglect of these points may be a slow but is a certain way of destroying any business ;
- That live and let live is a good motto ;
- That PATIENT RESOLUTE DETERMINATION to vanquish difficulties and extend business upon sound and upright principles, will always in the end meet with

*THEIR REWARD.*

## JOHN MACDONALD & CO.

Have no hesitation in saying that the observance of these principles would save an amazing amount of

*SUFFERING AND LOSS,*

Would secure a large amount of

*SOUND PROSPERITY,*

And will be of immense value to any one who adopts them as a part of their  
*BUSINESS SYSTEM.*

UNBOUNDED SUCCESS OF THE  
**FLORENCE SILENT-MOTION  
 SEWING MACHINE.**

The Florence Sewing Machine is the only machine that makes four kinds of stitches, three of which are made on no other machine, and are stronger and more elastic than any other.

It is the only machine that can sew in more than one direction, having a reversible feed.

It has an improved hemmer, making any width of hem, and easily managed. Owned exclusively by the Florence Company. It is the only machine having a self-adjusting shuttle tension; a great improvement over all others, rendering it easy to do good work on any fabric. It fastens the end of a seam better and quicker than a seamstress can.

*Active Agents Wanted in every Town and County in the Province.*

Great caution is necessary as to where proprietary articles are purchased, particularly those with reference to the toilet. Shopkeepers of small repute offer for sale their spurious and pernicious imitations of proprietary articles, under the lure of being cheap, regardless of the consequences. ROWLAND'S TOILET REQUISITES, their MACASSAR OIL, KALYDOR, and ODONTO are peculiarly the subjects of these innovations.

### **POLICIES PAYABLE DURING LIFE TIME.**

The important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the **BRITON MEDICAL AND GENERAL** to be almost unparalleled in the History of Life Assurance, *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family, and a more valuable security to creditors in the event of an early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.*

# AMERICAN WATCH FACTORY, WALTHAM, MASS.

## WALTHAM WATCHES

ARE UNIVERSALLY ACKNOWLEDGED TO BE THE GREATEST SUCCESS IN  
WATCH MAKING EVER KNOWN.

The Company has gone on from humble beginnings until now it employs a capital of over \$1,200,000 00 (one million two hundred thousand dollars), and keeps constantly at work about 700 operatives; producing over 2,500 watches annually. There are now in use over half a million Waltham Watches from the cheap "Home" Watch at less than a score of dollars, to the rich Gold Hunter, or the Ladies "Gem," worth from one hundred dollars upwards.

To explain the universal preference for these unrivalled machine made watches, it must be remembered the Waltham Watches—*are Accurate, are Beautiful, are Cheap, are Durable, are Elegant, are Fashionable, are Good, are Handsome, are Inimitable, are Jewelled, are Keyless, are Levers, are Machine-made, are Necessary, are Ornamental, are Perfect, are Reliable, are Serviceable, are Timekeepers, are Useful, are Valuable, are Warranted, are Yankee-made.*

These watches are now made in all sizes from the Ladies and Boys size, to the large six ounce case for engineers. They are also made in several grades of quality and stamped with the registered marks of the company—viz.: "Home Watch Co.," "William Ellery," "P. S. Bartlett," "Waltham Watch Co.," "Appleton, Tracey and Co.," "Am Watch Co.," and "American Watch Co.," these are all WARRANTED by SPECIAL CERTIFICATE, except the "Home." The guarantee of the Company should, in all cases, be required, by the buyer. In no other way can WORTHLESS IMITATIONS be avoided.

### WALTHAM WATCHES ARE

*Adapted for Artisans, are Best for Boys, are Correct for Conductors, are Durable for Dealers, are Exactly for Engineers, are First-rate for Farmers, are Gentle for Gentlemen, are Hardy for Hackmen, are Jewelled for Jews, are Kingly for Knights, are Lovely for Ladies, are Massive for Men, are Never for Nobody, are O. K. for Officers, are Precisely for Presents, are Queenly for Queens, are Reliable for Railroads, are Sure for Shanty-men, are Trusty for Time Keepers, are Unequalled for Uncles, are Valuable for Viceroys, are Warranted for Watchmen, are 'Nactly for 'Apters, and are Yonder for You in full stock by all dealers.*
